journal of MEMBRANE SCIENCE

Subject index

Activity coefficients, 75
Anion-exchange membrane, 85, 117

Binary mixture of proteins, 107
Biotechnology, 247

Capillary viscosity, 209
Ceramic membranes, 1, 29, 45
Colloidal fouling model, 185
Composite membrane, 257
Concentration distribution, 217
Concentration polarization, 201
Concentration polarization equation, 107
Coupled copper transport, 267
Current density distribution, 217

Darcy's law, 209
Diffusion, 141, 169
Diffusion and convection, 275
Diisopropylamine, 257
Dissociation, 229
Donnan equilibrium, 75, 157
Donnan potential, 229
Dynamically formed membranes, 247
Dynamic capillary condensation porometry, 29
Dynamic membrane, 107

Electrodialysis, 217
2,3-Epithiopropyl methacrylate, 117
Ethyl cellulose, 95

Fouling, 185, 247

Gas permeation, 95
Gas separations, 1, 45, 95, 239
Gel layer model, 185
Gel polarization model, 107

Hollow fiber membranes, 131
Hyaluronic acid esters, 157
Hydrogels, 157
Hydrophobic membrane, 209

Inorganic membranes, 1, 29, 45, 239

Lactic acid, 185
Limiting current density, 217

Mass transfer, 59
Mass transfer resistance, 185
Membrane charge, 229
Membrane potentials, 75
Membrane preparation and structure, 1, 29, 239, 257
Membrane reactors, 1, 275
Metha-cryloyloxyethyltrimethylammonium chloride, 117
Microfiltration, 247
Microporous and porous membranes, 29, 45
Module design, 131
Multicomponent liquid membranes, 267
Multicomponent transport, 275

Nanofiltration, 185
Nylon 6 membrane, 229

Oxygen, 239

Permeate–membrane interaction, 209
Permeate side, 141
Permselectivity, 75
Perovskite, 239
Pervaporation, 59, 201
Plasma polymerization, 257
Poly(dimethylsiloxane), 169
Poly(vinyl chloride) membrane, 209
Pore size, 45
Pressure drop, 131

Radial flow, 131
Rejection model, 185
Resistance to mass transfer, 141
Reverse osmosis, 185

Selective separation of CO_2, 257
Separation of phenol/water, 201
Solvent transport, 85
Sorption, 169
Spiral wound module, 59

Technical solvents, 267

1994 Elsevier Science B.V.
SSDI 0376-7388

Terpolymer membranes, 117
Theory, 201
Thermoosmosis, 85
Transfer mechanism, 141
Transported entropy, 85
Transport kinetics, 267
Tubular ultrafiltration membrane, 141

Ultrafiltration, 107, 131
Uphill transport, 117

Vapor permeation, 169
Velocity distribution, 217
Volatile organic compounds, 169
Volume flux, 85

Waste waters, 267
Water sorption and diffusion, 157
Water treatment, 59

Zeta potential, 229
